

Magic Puzzle Fix[®]

Suited to all
puzzle sizes!

12 M.I.C.
Magic Puzzle Fix-sheets
Size of 1 sheet:
ca. 25 x 17,5 cm

**The advantages
are clear:**

Easy to use!

Simply stick
the M.I.C.sheet
to the back of
your puzzle.

The front of the puzzle
is not damaged - no
more annoying bubbles.

No drying time!

As liquid glue is not
used, there is no
drying time.

Your finished puzzle
does not go wavy.

You can hang up your
puzzle straight away.

Clean work!

You no longer have
sticky hands from the
liquid glue.

You no longer have to
remove excess glue
from your puzzle,
your clothes or
your worktop.

Before sticking on the
M.I.C.sheet, lay out the
pieces on the back of
your puzzle. Make sure,
that the sheets overlap
by at least 1 cm.

When you have finished,
the entire puzzle should
be covered with the
M.I.C.sheet.

For a 1000-piece puzzle
you need 9 sheets; for
smaller puzzles corres-
pondingly fewer are
required. The sheets
can also be cut using
scissors if necessary.

When everything is just
right, take the M.I.C.-
sheets off your puzzle
again. Peel the protec-
tive backing off the first
sheet and stick on the
sheet in the layout you
selected above.
Always stay about 1 to
2 mm from the puzzle
edges.

Once you have stuck
all the M.I.C.sheets in
place, press the sheets
again quite firmly, e.g.
using a rolling pin or
an empty bottle.
Finished!
You can already hang
up your puzzle on the
wall.
